MK

TELEGRAM MINI APP

Mehnatkash Korea MK App

Jobs, study and daily life in Korea — for Central Asians, in their own language.

Ali Muhammad · Founder & Builder

Home

THE PROBLEM

Working in Korea on a visa is full of hidden rules

Visa eligibility is unclear

Job posts rarely say which visas can apply.

Language barrier

Listings, procedures and employer messages are in Korean.

Hour limits are easy to break

Student and other visas cap working hours — a mistake can put the visa at risk.

THE PRODUCT

One app inside Telegram

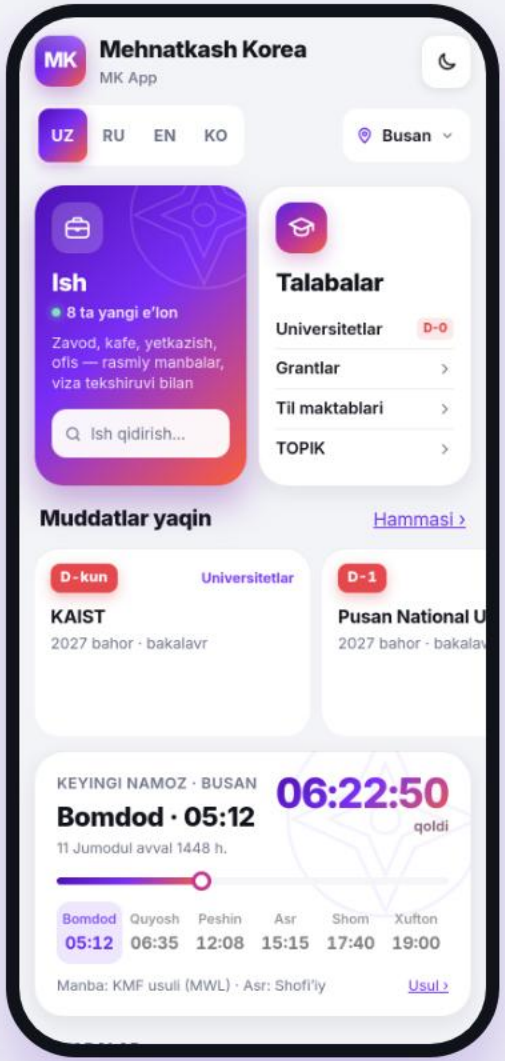

MK App opens straight from @mehnatkash_korea_bot. No install, no new account — the user's Telegram identity is verified and their visa, city and language carry over.

Jobs
visa-aware search

Students
universities, grants, TOPIK

HOW IT'S BUILT

Serverless, fast and AI-assisted

Telegram
Bot + Mini App

→

Cloudflare Workers
API & app hosting

→

D1
SQL database

→

Workers AI
language features

Built with a team of AI agents that I direct

I set the product goals, review every change and make the decisions; agents write, test and document the code. Signed Telegram initData secures every API call.

EARLY TRACTION

~50

users so far (early)

ROADMAP

What's next

- **Open MK App to all bot users**
  currently in staged testing
- **Sharper job matching**
  better visa and location accuracy
- **More cities and sources**
  wider coverage across Korea
- **Feedback loop**
  ship improvements from user input
